

CFP Energy

Research report · 2026-05-28

About

CFP Energy is a London-headquartered energy and environmental markets specialist focused on helping corporate and industrial clients manage the transition to a lower-carbon economy. It provides energy and environmental solutions across carbon markets, emissions compliance, renewable and environmental certificates, energy procurement, risk management, and aviation decarbonisation. The company operates primarily as a specialist advisory, brokerage/trading, and market-solutions provider, helping clients buy, sell, hedge, and manage exposure to environmental and energy products across UK and EU markets.
